AccountingSuite

Accounting software on desktop or in the cloud — your choice

AccountingSuite by 1C — accounting and business management with a Thai and English interface, Thai VAT and withholding tax built in.

Why on-premises?

- Your data stays on your own computer or company network — you control security
- Create an unlimited number of company databases
- Licenses by number of users: 1, 5, 10 or more — add users any time
- Switch between desktop and cloud — data is fully compatible

1. Manage daily operations —

accounting, sales, purchasing, inventory, payroll and fixed assets

2. Get a clear financial picture —

flexible reports, budgets, projects and time tracking

3. Work with built-in AI —

get help with the system and analyse financial data and reports

4. Adapt as your business grows —

customize workflows and reports; integrate with other systems

Using QuickBooks Pro and want to stay on desktop? NAT migrates your master data into AccountingSuite with the Data Import Tool.

Backed by 1C – business software since 1991

1,500,000+ companies using 1C	**11,000,000+** daily users	**100+** countries
